Process Slides Inspiration

I often use a rectangle to surround an image. The inspiration came from this image.

I really like this layout and I was inspired by the way it handled the images. But I didn't think my cover would fit this, so I added it to spread.

I used it with the pictures spliced together and the introduction of the characters on the far right.

It has a slash design that I really like, as well as its alignment and balance, both of which help me with typography very well.

Process Slides Iterations

COVER

First Design

I didn't think the title stood out enough, so I changed the font.

I changed a background. If I used a very large font, it would block the main character of the picture, so I changed to the magazine name and made it smaller.

Shrunk barcode

After I repeatedly watched other movie magazines, most of them introduced what the movie was about or added to the appeal of the movie.

The presence of the image made the cover crowded, so I removed the image and added it to my spread.

A Romantic and Tragic Love Story

Titanic was a British passenger liner, operated by the White Star Line, which sank in the North Atlantic Ocean on 15 April 1912 after striking an iceberg during her maiden voyage from Southampton, UK, to New York City.

Of the estimated 2,224 passengers and crew aboard, more than 1,500 died, which made the sinking possibly one of the deadliest for a single ship up to that time. It remains to this day the deadliest peacetime sinking of a supertanker or cruise ship. The disaster drew much public attention, provided foundational material for the disaster film genre, and has inspired

The name Titanic derives from the Titans of Greek mythology. Built in Belfast, Ireland, in the United Kingdom of Great Britain and Ireland, the RMS Titanic was the second of the three Olympic-class ocean liners—the first was the RMS Olympic and the third was the HMHS Britannic. Britannic was originally to be called Gigantic and was to be over 1,000 feet (300 m) long.

The Heart of the Ocean

It is said to originally be owned by Louis XVI and shortly after his execution in 1793, the diamond disappeared and was recast into a heart-like shape, known as "The Heart of the Ocean."

Titanic was under the command of Captain Edward Smith, who went down with the ship. The ocean liner carried some of the wealthiest people in the world, as well as hundreds of emigrants from Great Britain and Ireland, Scandinavia and elsewhere throughout Europe, who were seeking a new life in the United States.

The first-class accommodation was designed to be the pinnacle of comfort and luxury, with a gymnasium, swimming pool, libraries, high-class restaurants, and opulent cabins. A high-powered radiotelegraph transmitter was available for sending passenger "marconigrams" and for the ship's operational use. The Titanic had advanced safety features, such as watertight compartments and remotely activated watertight doors.

The ship was equipped with 16 lifeboat davits, each of which were capable of lowering three lifeboats, for a total of 48 boats; the Titanic carried only 20 lifeboats, four of which were collapsible and proved hard to launch while the ship was sinking. Together, the 20 lifeboats were capable of holding 1,178 people—which was only about half the number of passengers on

board, and only one-third of the number of passengers that the ship could have carried at full capacity (this was consistent with the maritime safety regulations of the era). In addition, when the ship sank, many of the lifeboats that had been lowered were only about half full. Titanic had departed from Southampton on 10 April 1912, then stopped at Cherbourg, France, and Queenstown (now Cobh), Ireland, before heading west towards New York.

On 14 April, four days into the crossing and about 375 miles (600 km) south of Newfoundland, she hit an iceberg at 11:40 pm ship's time. The collision caused the hull plates to buckle inwards along her starboard (right) side and laid five of her sixteen watertight compartments open to the sea; she had been designed to survive the flooding of up to four compartments.

A Romantic and Tragic Love Story

It was their last happy embrace before the ship sank. The ship is moving towards the iceberg. The good life will soon be gone...

Titanic was a British passenger liner, operated by the White Star Line, which sank in the North Atlantic Ocean on 15 April 1912 after striking an iceberg during her maiden voyage from Southampton, UK, to New York City. Of the estimated 2,224 passengers and crew aboard, more than 1,500 died, which made the sinking possibly one of the deadliest for a single ship up to that time. It remains to this day the deadliest peacetime sinking of a super liner or cruise ship.

The disaster drew much public attention, provided foundational material for the disaster film genre, and has inspired many artistic works. The disaster was met with worldwide shock and outrage, both at the huge loss of life and at the regulatory and procedural failures that had led to it. Public inquiries in Britain and the United States led to major improvements in maritime safety. Thousands of artefacts have been recovered and displayed at museums around the world. Titanic has become one of the most famous ships in history, depicted in numerous works of popular culture, including books, folk songs, films, exhibits, and memorials. Titanic is the second-largest ocean liner wreck in

hospital ship at the time of her sinking. The final survivor of the sinking, Millvina Dean, aged two months at the time, died in 2009 at the age of 97; there are no survivors of the Titanic that are still alive today. Provided foundational material for the disaster film genre, and has inspired many artistic works. The disaster was met with worldwide.

safety. The wreck of Titanic was discovered in 1985 by a Franco-American expedition sponsored by the United States Navy. The ship was split in two and is gradually disintegrating at a depth of 12,415 feet (2,069.2 fathoms; 3,784 m). Thousands of artefacts have been recovered and displayed at museums around the world. Titanic has become one of the most famous ships in history, depicted in numerous works of popular culture, including books, folk songs, films, exhibits, and memorials.

Titanic is the second-largest ocean liner wreck in the world, only being surpassed by her sister ship HMHS Britannic; however, she is the largest sunk while in service as a liner, as Britannic was in use as a hospital ship at the time of her sinking. The final survivor of the sinking, Millvina Dean, aged two months at the time, died in 2009 at the age of 97; there are no survivors of the Titanic that are still alive today. The wreck of Titanic was discovered in 1985 by a Franco-American expedition sponsored by the United States Navy. The ship was split in two and is gradually disintegrating at a depth of 12,415 feet (2,069.2 fathoms; 3,784 m). Titanic was under the command of Captain Edward Smith, who went down with the ship. The ocean liner carried some of the wealthiest people in the world.

James Cameron

Cameron's films have grossed approximately US\$2 billion in North America and US\$6 billion worldwide. Avatar and Titanic are the highest and third highest-grossing films of all time, earning \$2.85 billion and \$2.19 billion, respectively. Cameron holds the achievement of having directed the first two of the five films in history to gross over \$2 billion worldwide.

02 | FILM CRITIC

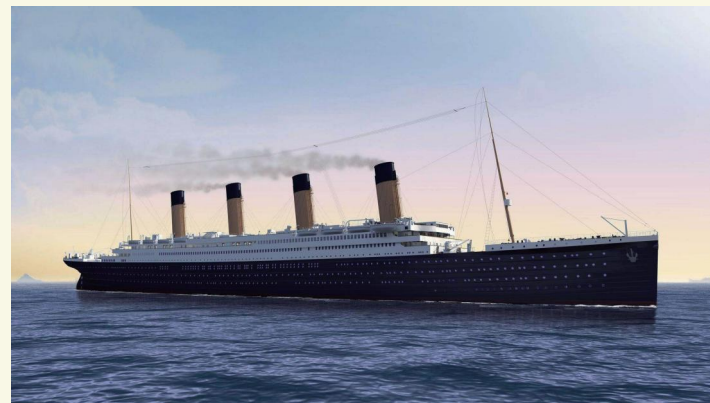

First Design

Final Design

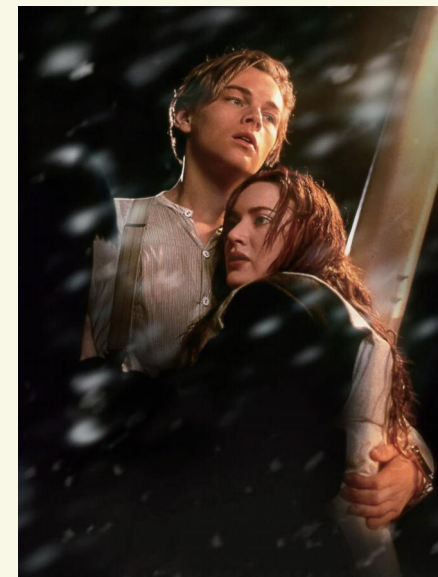

Changed the color more suitable for the Titanic. Changed the font to make it readable. Rearranged the text and images to make the spread neater. Added the first draft cover to the spread and adjusted its rotation angle to align with the other images. Removed unnecessary frames.

Process Slides Image Editing

I wanted to add the ship to the spread, so I changed the size and orientation of the image.

The original background doesn't look good, take the necklace out and put it into a background that matches the spread.

Take the figure out and put it in the spread.

Process Slides Significant Design

COVER

Add two horizontal lines to the top and bottom of the running head to make it stand out.

Slant all white cover lines slightly.

Mark attractive text in yellow.

Highlight the headline in yellow and stretch it out to fit the cover better.

Surround the black font with a white rectangle to keep it balanced against the top of the cover.

Process Slides Significant Design

SPREAD

Use a representative diagram to frame two pages across.

Attractive and powerful text uses a specific background to make it stand out.

Insert special text and images into the text to increase the appeal of the spread. Make it look less like a boring article.

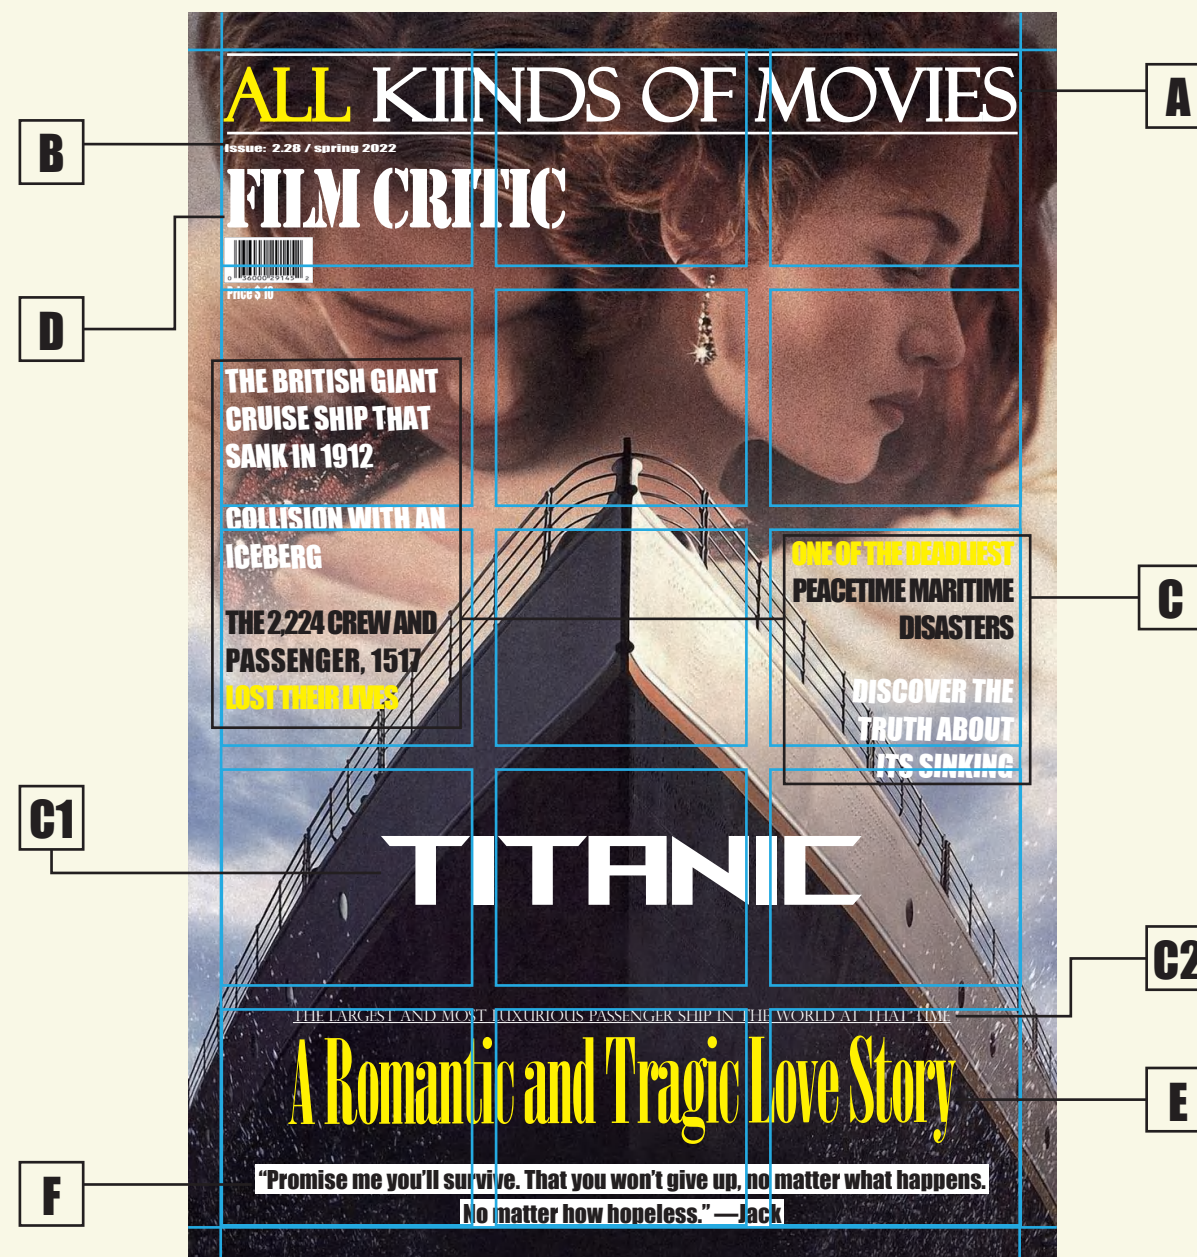

Overlap two small contrasting images and adjust their angles. Add a white background to the back of the images to make them look like film photos.

Colors matching the sky, sea and ships were used to fill in the gaps in the text.

Add a little line design to make the overall look more comfortable.

Balance

Because of the larger image, I placed the remaining images in the lower right corner to balance with the larger image in the upper left corner. The text is done the same way.

Alignment

The frames are aligned with the text and images using multiple alignments of normal parallel slashes in parallel. Almost all of the text is neatly aligned to enhance the overall aesthetics of the spread.

Proximity

Use overlap to fit three images together in a way that does not look crowded and adds to the image. The same spacing in the text also makes the text uncrowded allowing spread to increase readability.

Contrast

Use some frames to enclose important text to create contrast with other plain text.

Space

Because this magazine is about the Titanic. It is older, so a dense layout is used, but it is not crowded. The neat layout leaves little negative space, and the small amount of white space balances the text and images.
